

Dermatological Spa Clinic **IWOLANG** is located in Iwonicz Zdrój in the pristine environment of the Beskid Niski mountain range. Iwonicz Zdrój is a popular health resort which specialises in the treatment of dermatological diseases; its brines containing wood tar and boric acid have been used since the beginning of the 18th century.

The clinic specialises in the treatment of:

- psoriasis
- vitiligo
- alopecia areata
- atopic dermatitis
- precancerous conditions and skin carcinomas with a **non-invasive** photodynamic method based on the use of red light (PDT).

The clinic also offers surgical procedures in the area of **aesthetic dermatology**.

Treatment is provided on the out-patient or in-patient basis, using state-of-the-art technology and the latest scientific advances. Patients are provided round-the-clock medical care and comfortable conditions of stay.

A separate line of the Clinic's operations is research work which involves investigation into the efficacy of new medicinal products for use in dermatology. **IWOLANG** co-operates with the world's largest pharmaceutical and cosmetic corporations.

IWOLANG recently celebrated its 15 anniversary. All work related to the operations of the Clinic and the Research Team is headed by Professor **Andrzej Langner, MD, PhD**.
